

CE Marking – Dry Fix Range

From the 1st July 2013 under the Construction Products Regulation (CPR) over 400+ Building Products were required to carry the CE mark covering a broad range of construction products. Numerous roofing products including but not limited to Roof Coverings, waterproofing products, roof windows and upstands are covered under the legislation.

Roof accessories are not as yet a harmonised category under the legislation. For this reason, CE Marking is not a requirement for or dry fix range. Therefore, we cannot generate a CE mark or a DOP for the products outlined below. This stands for all materials including Aluminium, Steel, Textured Steel and Plastic. See list of products below.

C02 - Slate Dry Verge

C03 - Retro - Fit Slate Dry Verge

C05 - Ridge Capping

C06 - Aluminium Soaker

C07 - Slate Valley Trim

C08 - Tile Dry Verge

C08P - Tile Dry Verge

C08T - Tile Dry Verge

C09 - Tile Dry Verge

C12 - Valley Trough

C14 - Continuous Alu. Soaker

C15 - Tile Valley Trim

KGR - Ridge Capping

NWA welcomes the introduction of improved testing, certification and oversight of construction products. NWA look forward to being able to provide a CE mark with our products along with any necessary testing due to the quality of our products.

All NWA products comply with BS 5534 mechanical fixing requirements along with meeting the NHBC standards. All our products are manufactured to an exceptionally high standard in accordance with the internationally recognised ISO 9001 Quality Management System.
