## KLOBER UNI-LINE SLATE VENT

## Product Details

Uni-Line® Slate Vent is a universal In-line Slate Vent that suits most man-made and natural slates.

## Product Features

- In-line design.
- Fully wind tunnel tested.
- Built in downpipe allows direct ventilation to roof space.
- No soil/mechanical adaptor required.

## Area of application

Suitable for:

- 600 x 300mm (24"x 12") and 500mm x 250mm (20"x 10") fibre and natural double lap slates.
- High or low level roof space ventilation.
- For roof pitches of 22.5° and above.
- Most natural and fibre cement slates.
- Batten cutting only required below 225mm gauge.

## Technical

Performance:	Provide 12,000mm <sup>2</sup> effective vent area (6,500mm <sup>2</sup> effective area)
Spacing:	5mm opening at 1.2m centres 10mm opening at 0.6m centres
Airflow resistance when used as SVP/extract terminal:	54m <sup>3</sup> /hr (15 litres/sec): 24Pa
	108m <sup>3</sup> /hr (30 litres/sec): 96Pa
	216m <sup>3</sup> /hr (60 litres/sec): 384Pa
